

This PDF was created using [LibreOffice](#) via File...Export as PDF

Use PDF's sparingly on web pages. People should be able to find your information by simply loading a web page. They should not be forced to download a reader (although most people have a PDF reader like Adobe Acrobat).

DESIGNS

Also note that many PDF's (unlike this one) can get very large (file size) and could take a long time to download. Be nice, make the information on your site web friendly, stay away from PDF's.
